

Master transports internationaux 2024-2025

Cours d'anglais de Nicholas Sowels

1) Homework 1 (20% of total mark) for 5 October

Write a personal statement (a bit like a cover letter) explaining your motivation for what you are studying, for the apprenticeship you are doing or hope to do, and the kind of job you are looking for in the large field of transport. You can find more information here:

<https://www.ucas.com/undergraduate/applying-university/how-write-ucas-undergraduate-personal-statement>

2) Midterm test: first half of December (20%)

This will be a general, short test on the things covered in class.

3) Homework 2: in groups of 4. The presentations late January 2025 (20%)

Prepare a virtual on-site visit of a transport installation, somewhere in the world, outside Europe: a port, an airport, a multimodal site, a major train station-shunting yard, a major logistics site, etc.

The presentation should include: a PowerPoint; a written presentation about the site (2,000 words of text), explaining the historical development of the site, its main activities, the main actors, the impact of Covid-19 and future prospects.

The document should be well presented and assembled.

Also, find one or two good Internet videos (Youtube?) about the site. They should be about 5 to 10 minutes long and reveal the activities which occur there.

4) Final exam – the last course in February 2025 (40%)
